

# CURRICULUM VITAE – BARBARA ADOLPH

## PERSONAL PROFILE

---

**Profession:** Agricultural Research and Development Specialist  
**Year of Birth:** 1964  
**Nationality:** German and British  
**Current position:** Senior Associate, International Institute for Environment and Development (IIED), and independent international development consultant, London, UK  
Skype: Barbara.Adolph  
Email:  
[Barbara.adolph@iied.org](mailto:Barbara.adolph@iied.org) (for IIED-related activities)  
[Barbara.adolph@thenrgroup.net](mailto:Barbara.adolph@thenrgroup.net) (for everything else)

## ACADEMIC QUALIFICATIONS

---

July 2006 **MBA, Business Administration**, The Open University Business School, Milton Keynes, UK (with merit)

December 1998 **PhD, Agricultural Economics and Social Sciences**, Institute of Agricultural Economics and Social Sciences in the Tropics and Subtropics, University of Hohenheim, Stuttgart, Germany / International Crops Research Institute for the Semi-Arid Tropics, Hyderabad, India. Dissertation on 'Farmers' participation in watershed management programmes in South India' (with '*summa cum laude*')

July 1993 **Certificate, Farming Systems Research**, International Centre for Development Oriented Research in Agriculture, Wageningen, The Netherlands

June 1990 **MSc, Human Geography**, Institute of Geography, University of Bonn, Germany. Thesis on 'Structure and problems of small rubber farms in West Malaysia'

## PROFESSIONAL PROFILE

---

Barbara is a highly motivated and experienced agricultural research and innovation specialist. Her main areas of expertise are the design, improvement and evaluation of research and advisory services for sustainable agriculture and food systems. She has worked with and advised government agencies, research organisations, civil society organisations and donors working in Sub-Saharan Africa and Asia, including the WFP, FAO, CGIAR, FARA, ASARECA and EIARD. Recent work includes leading a major UKRI funded research project on land use trade-offs in Sub-Saharan Africa, focusing on the drivers and impacts of agricultural expansion, including impacts on biodiversity and rural livelihoods. She also worked with African and European partners to assess the role of small farms and small food businesses for food and nutrition security.

Barbara worked for 10 years as a Principal Researcher in IIED, after working as a consultant for Triple Line Consulting in London, and as a scientist with the Natural Resources Institute in Chatham (UK), the International Crops Research Institute for the Semi-Arid Tropics in Hyderabad (India), and the University of Hohenheim (Germany).

## LANGUAGES

---

German	Mother tongue
English	Fluent
French	Fluent (listening, speaking and reading), intermediate (writing)
Spanish	Intermediate (listening, speaking and reading), basic (writing)
Portuguese	Basic
Hindi / Urdu	Basic
Bahasa Indonesia	Basic

## COUNTRY WORK EXPERIENCE

---

Afghanistan, Albania, Bangladesh, Benin, Burkina Faso, Burundi, Cameroon, Democratic Republic of the Congo, Republic of the Congo, Egypt, Ethiopia, France, Germany, Ghana, India, Indonesia, Kenya, Madagascar, Malawi, Malaysia, Mali, Namibia, Nepal, The Netherlands, Nigeria, Niger, Rwanda, Senegal, South Africa, Swaziland, Tanzania, Thailand, Uganda, United Kingdom, Zambia, Zimbabwe

## EMPLOYMENT RECORD

---

- 03/2012 – 3/2022: Principal Researcher and leader, Agroecology team, Natural Resources Group, [IIED](#), London, UK. Research and development related to sustainable agriculture and food systems.
- 10/2006 – 02/2012: Senior Consultant, [Triple Line Consulting](#), London, UK. Consultancy assignments on the design, implementation, monitoring and evaluation of agricultural research, development and policy projects and programmes.
- 05/1998 – 10/2006: Senior Scientist, [Natural Resources Institute](#), University of Greenwich, Chatham, UK. Research and consultancies on socio-economic aspects of agricultural research projects on roots and tubers, natural resources management, rural livelihoods and innovations, and sustainable development
- 11/1993 – 07/1997: Research Associate, [ICRISAT](#) (International Crops Research Institute for the Semi-Arid Tropics, Patancheru, India) and Institute for Agricultural Economics and Social Sciences in the Tropics and Subtropics, University of Hohenheim, Germany. In charge of a research project on *"Farmers' participation in watershed management programmes in South India"*.
- 06/1990 – 06/1991: Research Assistant, Council for Tropical and Sub-tropical Agricultural Research ([ATSAR](#)), Bonn, Germany. Development of a catalogue system (with PC/CDS ISIS database) for a multi-lingual agricultural and development-oriented library; bibliographic enquiries, editing of agricultural publications.

## RELEVANT ASSIGNMENTS

---

### Agricultural research and development

- 2022:** Consultant carrying out an evaluation and lesson learning study of the **Hill Approach** (an integrated approach to address soil erosion, tenure insecurity and low agricultural productivity) in South Kivu, Eastern DRC. The approach was developed and piloted by the USAID Bureau for Humanitarian Assistance (BHA)-funded, Mercy Corps-led Food Security Program (FSP).

- 2017-2022 Principal Investigator / project leader of the RCUK / GCRF funded research project Sentinel [“Social and environmental trade-offs in African agriculture”](#)**, leading a team of researchers from 10 African and UK research organisations to explore impacts and drivers of agricultural expansion and agriculture / food production – forest and biodiversity conservation trade-offs in Sub-Saharan Africa (Ghana, Ethiopia and Zambia)
- 2020-2021:** Lead researcher for a [desk study](#) on the state of planet- and people positive agriculture in East Africa (Kenya, Ethiopia, Rwanda, Uganda) for the IKEA Foundation.
- 2016-20 Participating researcher in the project [“Small Farms, Small Food Businesses and Sustainable Food Security” \(SALSA\)](#)** under the EU-funded Horizon 2020 programme, with European and African partners (Ghana, Cape Verde and Kenya). Analysis of regional food systems and assessment of the contribution of small farms to sustainable food and nutrition security.
- 2016-20 Team leader of a research project on [“Supporting smallholder farmers’ decision-making: Managing trade-offs and synergies for sustainable intensification”](#)** under the DFID-funded [SAIRLA \(Sustainable Agricultural Intensification Research and Learning in Africa\) programme](#). Field research and policy engagement (via national learning alliances) in Ghana, Malawi and Burkina Faso.
- 2014-18 Integrated Support Services-Food and Nutrition Security, & Sustainable Agriculture (ISS-FANNSA):** Provision of advice and support services to the EC directorate for agriculture and rural development (C1). Organisation and facilitation of ‘hot topics’ seminars for EC delegation staff.
- 2014-15 Desk study on [radical adaptation to climate change in the agricultural sector](#)** with CCAFS and CSIRO. Identification of policy pointers to support transitions to that address root causes of vulnerability and climate change.
- 2012-17 Research and policy analysis on agricultural innovation systems, smallholder farmer livelihoods and agricultural services around large scale irrigation dams in West Africa ([Global Water Initiative](#)).** The project aimed at developing and promoting sustainable agricultural systems, improved knowledge, and social learning. It worked with stakeholders in three large dam sites in West Africa (Senegal, Mali, and Burkina Faso) to generate policy recommendations to inform future investments in irrigation infrastructure, to increase climate change resilience and to improve research-extension-farmer linkages. It also included an analysis of agricultural advisory services in irrigation schemes in Niger to inform the development of a new advisory services policy in Niger.
- 2012-14 Political economy analysis on drivers of agricultural policy choices and the role of knowledge in decision making.** Development of two case studies on agricultural intensification in Nepal (peri-urban agriculture) and Burkina Faso (Bagré dam).
- 2012 Action research on inclusion and scaling of oil seed value chain in Uganda and Burkina Faso (SNV).** This research initiative aimed to better understand farmers’ choices in terms of oil seed production and marketing, and how these choices are influenced by a range of value chain interventions by SNV and other development actors – including regional multi-stakeholder commodity platforms.
- 2010 [Synthesis report for the Global Forum for Rural Advisory Services \(GFRAS\)](#).** The report provided the background information and context for the development of GFRAS’ 5-year strategy.

- 2009-12** **Coordination of the [EIARD](#) (European Initiative for Agricultural Research for Development) FSTP (Food Security Thematic Programme of the EU) project.** The project aimed to achieve “Coherent, coordinated (at national, regional, and global levels), relevant and effective European policies for and investments in agricultural research for development that support the food security agenda”. The emphasis was on supporting the design and harmonisation of effective agricultural research for development investments, policies and programmes.
- 2008** **Preparation of a project document (detailed Work Programme and budget) for EIARD activities** for 2008-2011, financed out of the FSTP (GTZ). EIARD aims to enhance the appropriateness and effectiveness of European investments in ARD at national, regional, and international levels both in Europe and developing countries through a coordinated European position on ARD.
- 2007-08** **Identification and formulation mission of regional and continental agricultural research programmes for Africa (Food Security Thematic Programme / EU).** Part of a team of consultants designing a Euro 45 million programme of future EU support to regional and continental agricultural research in Africa. This involved an analysis of donor support and its effectiveness, recommendations for priority setting and implementation, and the detailed design of several of the components, including programme log frames and M&E systems. Field visits to Ghana, Cameroon, Uganda and Kenya.
- 2006-07** **Support to Makerere University for curriculum development in Uganda (British Council / NRI).** Part of a team supporting the Department of Agricultural Extension/Education, Makerere University, to offer innovative, demand-driven, need-based modular degree programs for private agricultural advisory service providers in East Africa.
- 2006** **Livelihoods analysis for the Food and Agriculture Organisation’s (FAO) Alternative Agricultural Livelihoods Programme in Afghanistan.** This involved training staff from government agencies (Ministry of Agriculture, Irrigation and Livestock – MAIL) and civil society organisations in livelihoods analysis, and designing, carrying out and analysing livelihoods analysis surveys in two provinces of Afghanistan. The survey covered opium poppy cultivation, processing and marketing – in particular related decision-making processes at household level. This involved two months of field work in Balkh and Herat provinces, liaising with local stakeholders (including Community Development Committees) to develop pilot alternative livelihood interventions. Findings from the survey have been used for policy development (e.g. the 2006 Master Plan of the Ministry of Agriculture, Irrigation and Livestock).
- 2005/06** **Facilitating farmers’ enterprise selection process in Uganda (DFID / NRIL).** Social development advisor to a two-year project supporting the National Agricultural Advisory Services in Uganda in developing tools and mechanisms to link small agricultural producers to markets by empowering farmer organisations in accessing, gathering and analysing market information and carrying out gross margin analysis.
- 2003-06** **Linking demand for and supply of agricultural information in Uganda (DFID / NRIL).** Social development consultant to a three-year project supporting the National Agricultural Research Organisation, the National Agricultural Advisory Services and Civil Society Organisations in improving linkages between users and producers of agricultural information and generating relevant information through experiential learning and innovation.

- 2000-06 Farmer participatory development of methods to control whitefly-borne virus diseases on cassava and sweet potato in Uganda and Tanzania (DFID / NRIL).** Social development advisor to several research projects supporting partners from agricultural research and development organisations and civil society organisations in the participatory development, validation and implementation of community-based methods and approaches to control virus diseases in cassava and sweet potatoes.
- 2000-03 Community-based grain storage and management in South India (DFID / NRIL).** Social development advisor to a research project developing and testing a range of technical approaches and institutional arrangements for community-based grain storage to support food security among poor households. Development and presentation of policy recommendations to promote a de-centralised approach to food security.
- 2001-2 Analysis of the role of [Common Pool Resources for rural livelihoods in India](#) (DFID / HTS).** Team leader of a multi-agency, multi-disciplinary project (including as partners the Aga Khan Rural Support Programme in Gujarat, Centre for World Solidarity in Andhra Pradesh, and the Central Research Institute for Dryland Agriculture in Hyderabad) to identify the role of CPRs (water resources, grazing lands, trees) in the livelihoods of rural people in Andhra Pradesh and Gujarat, in order to develop policy recommendations to state governments and inform future research and rural development interventions.
- 1998-99 Social development advisor to the Kavango Farming Systems Research and Extension project, Namibia (DFID).** In charge of social development aspects and M&E of the project, including organisational development for the Ministry of Agriculture, Water and Rural Development to improve research-extension linkages, and incorporate a systems and livelihoods perspective into its strategy. This overseas assignment also involved participatory livelihood analysis of San bushmen and Bantu communities in Northern Namibia to inform future rural development interventions, farmer participatory research on dryland crops, and training of government and civil society organisations in livelihoods analysis and M&E (full-time overseas assignment for 18 months).
- 1998 Study for the Overseas Development Institute (ODI) on the role of self-help groups in natural resources management in South India.** Field work in South India to learn lessons from experiences in self-help group involvement in watershed management and forestry programmes, to inform future NRM research and development initiatives.
- 1994-97 Comparison of the approach and impact of government and NGO implemented watershed management projects in India (GTZ / University of Hohenheim / ICRISAT).** Long-term overseas assignment / PhD research on the participatory assessment of different community-based approaches to natural resources management, emphasising farmers' perception of impact in a process of participatory evaluation. Development of participatory M&E approaches and methods.

### **Monitoring, evaluation, and impact assessment of agricultural research and development programmes**

- 2013-14 [Forward-Looking Review of the CGIAR Challenge Program on Water and Food](#).** The CPWF was a 10-year research programme aiming to transform the way research on water and food is conducted. The review considered scientific outcomes and impacts as well as outcomes related to

institutional innovations and partnerships, and how both together contributed to impact.

- 2011** **Joint EPMR and JEE of FARA.** The Forum for Agricultural Research in Africa (FARA) in Accra, Ghana, aims to create broad-based improvements in agricultural productivity, competitiveness, and markets by supporting Africa's sub-regional organisations in strengthening capacity for agricultural innovation in Africa, to sustainably reduce African food insecurity and poverty, and to enhance environmental conditions. It was co-funded by a World Bank-managed MDTF (Multi-Donor Trust Fund). The purpose of the joint EPMR (External Program and Management Review) and JEE (Joint External Evaluation) was to establish the extent to which FARA has contributed to its mission of creating broad based improvements in agricultural productivity, competitiveness, and markets by strengthening the capacity for agricultural innovation.
- 2011** **Team leader for the mid-term review of ASARECA's Operational plan.** The Association for Strengthening Agricultural Research in Eastern and Central Africa in Entebbe, Uganda, is an umbrella organisation of ten National Agricultural Research Systems. It was co-funded by a World Bank-managed MDTF (Multi-Donor Trust Fund). The MTR assessed progress made in implementing ASARECA's Operational Plan (2008-13) and made recommendations for improvements in governance, management, strategy, and implementation.
- 2010-11** **Case studies on seed multiplication in Nepal and Bangladesh, as part of an impact evaluation of the Research Into Use programme (DFID).** The evaluation aimed to identify strengths and weaknesses of this programme and make recommendations for future DFID engagement.
- 2009-10** **Programme Monitoring and Review Panel for ASARECA** for the EC delegation in Uganda. The PRMP assisted ASARECA in monitoring the implementation and performance of the 8th EDF Regional Support Programme (RSP), and reviewed the overall progress of the association in terms of its institutional development, implementation of the Medium Term Operational Plan (2008-12) and delivering on its results, regardless of the donor funding source. 3 monitoring visits of four weeks each were carried out over a period of 14 months (to Uganda, Kenya, Tanzania, Ethiopia, Rwanda, Burundi, DRC and Madagascar). Monitoring visits involved a team of 12 donor representatives and consultants, with Barbara as team leader of the EC team and coordinator of the entire multi-donor missions.
- 2009** **Mid-term Review of the CATALIST (Catalyze Accelerated Agricultural Intensification for Social and Environmental Stability) project** of IFDC (the International Centre for Soil Fertility and Agricultural Development) – team leader. The 5-year, Euro 22 million project aimed to contribute to peace and to create conditions to halt environmental degradation in the Albertine Rift Valley (DRC, Rwanda and Burundi) through accelerated agricultural intensification and improvement of the resource base for agriculture through labour-intensive infrastructure development.
- 2008-09** **Review of DFID's extra-budgetary support to the World Food Programme.** The Institutional Strategy aimed to develop the capacity of World Food programme in terms of preparedness for and response to humanitarian emergencies, knowledge management and learning, and partnership development. Field visits to Thailand, Senegal and Egypt.
- 2008-09** **M&E Toolkit (DFID / GRM).** Development of a Monitoring and Evaluation Toolkit for the Ministry of Agriculture, Irrigation and Livestock of the Afghanistan (follow-up from training course in early 2008 – see 'training').

- 2007** **End-of-project evaluation, FARM-Africa's Kenya Dairy Goat and Capacity Building Project (EU).** Assessment of the outcome of a three-year project developing a model for dairy goat development in semi-arid parts of Kenya. The project had components on capacity development, community-based breeding and animal health care, fodder and water point development, and participatory M&E.
- 2001** **Evaluation of the Outreach Programme of Uganda's National Agricultural Research Organisation (EU).** Design of a programme for EU support to the National Agricultural Research Organisation. This mission included an impact assessment of EU support to the Outreach Programme, which aims to bridge the gap between agricultural research and advisory services by giving farmers a voice in research priority setting, and strengthening farmers' involvement in the research process through on-farm testing of agricultural technologies.

### **Knowledge management, communication, research uptake, lesson learning**

- 2014 – 16** **Support to the Irish Aid climate change learning platform.** The purpose of this platform was to enable the sharing of experience and knowledge and, thereby, the improvement of development outcomes by addressing climate changes as a cross-cutting issue in Irish Aid's development programs. Case study in Zambia on integrating climate risk assessments into IA's Local Development programme, which aimed at increasing food security and develop sustainable livelihoods in Northern Province.
- 2010** **Review of DFID's Research and Evidence Division's agriculture and human development (health and education) portfolios to learn lessons on research communication and uptake (DFID).** The review provided a high-level stock-take of the nature of research uptake activities within the Human Development and Agriculture portfolios and identified potential case studies on good or innovative practice in research uptake. Team leader.
- 2009** **Development of a knowledge management strategy for the Grant Management Unit of the World Food Programme (WFP).** This involved a review of grant reports to identify and document good practice and useful lessons, undertaking an online survey on knowledge management practices and needs in WFP, and based on this developing a knowledge management strategy to enable the sharing of lessons from grant funded tools and processes within WFP. Team leader.
- 2009** **Donor review on research communication for DFID's Research Uptake team.** The review covered 17 donor organisations (including DFID) to document and analyse their policies, investments and programmes related to research communication, as part of wider initiatives to promote research uptake and use.
- 2008 / 09** **Review of DFID's research communications programme portfolio (DFID Research).** Leading a team of eight consultants to analyse the programme portfolio in relation to DFID's Research Strategy and develop recommendations to ensure that lessons learnt from these programmes inform DFID's research communication strategy and future investments. The 17 programmes reviewed (including R4D, MK4D, ICT4D and ComGap) aimed to 're-package' and disseminate research findings to a diverse range of users and intermediaries and build their capacity to demand and use research.

- 2006 Lesson learning study with the Flower Valley Conservation Trust, South Africa (FFI - Fauna and Flora International).** Assessment of the social and economic impact of a programme for the sustainable utilisation of the fynbos vegetation in the Western Cape. Included an assessment of the effectiveness of their certification system that enables them to access the European cut flower market.
- 2005 Study on lessons learnt from rice research support in West Africa and South Asia (DFID / NRIL).** Documentation and analysis of lessons learnt through stakeholder consultations and review of existing research programme documentation. The outcome of this study fed into DFID's Strategy for Research on Sustainable Agriculture.
- 2005 Study on capacity development of research systems in developing countries for DFID Central Research Department.** Desk study drawing on experiences in different sectors (agriculture, health, governance and civil society) to develop recommendations to DFID CRD, in order to assist them in screening research proposals and ensure that research programmes contribute to capacity development.
- 2002-03 Documentation, analysis and promotion of indigenous soil fertility management practices in semi-arid India (DFID / AALP).** Development of a soil fertility management manual for agricultural research and extension practitioners, based on a documentation and analysis of indigenous soil fertility management practices. The documentation used participatory video to document farmers' perception of the benefits of the various practices. The resulting tool kit was used by the Andhra Pradesh Rural Livelihoods Programme to train agricultural extension staff in the State. Team leader.
- 2000-2006 Promotion of methods to control whitefly-borne virus diseases on cassava and sweet potato in Uganda and Tanzania (DFID / NRIL).** Several research projects supporting partners from agricultural research and development organisation and civil society organisation in the development of training materials and communication strategies (including radio and video) on Integrated Pest and Disease Management.

### Facilitation and training

- 2015 Facilitation of the first CGIAR MEL COP (Monitoring, Evaluation and Learning Community of Practice) workshop.** The workshop resulted in an agreed work programme for the COP.
- 2014 Co-facilitation of workshops on climate change adaptation and mitigation of Irish Aid partners.** This included a partner workshop in Ireland and in Zambia, as part of the Irish Aid climate change learning platform (see Knowledge management etc. above)
- 2008 and 2009 Training workshop on Livelihoods Analysis and Social Appraisal (University of Leeds, School of Earth and Environment),** for students of the MSc Sustainability Module Sustainability Assessment: Tools and Techniques.
- 2008 Support to Strategic Planning for Sustainable Rural Livelihoods in Afghanistan (DFID / GRM).** Development and delivery of a training course on applied Monitoring and Evaluation for directors and staff of the Ministry of Agriculture, Irrigation and Livestock, and development of recommendations for a ministry-wide M&E system. This involved both classroom and field-based training, including project visits to Nangahar and Balkh provinces.

- 2008** **Facilitation and documentation of a round table meeting between AFAAS (African Forum for Agricultural Advisory Services) and FARA, Ghana,** to agree on a joint approach to African agricultural research and development in line with FAAP (Framework for African Agricultural Productivity).
- 2006** **Co-facilitation and documentation of the Joint Africa Humanitarian Network, Africa Hunger Task Team and Disaster Risk Reduction workshop, Uganda (DFID).** This workshop aimed at developing a common language and framework for the implementation of DFID humanitarian policy in Africa.
- 2004** **Training of trainers in agro-biodiversity, gender and local knowledge systems for FAO's LINKS programme** in Swaziland and Tanzania (**FAO**). Pre-testing / validating training modules and training scientists and policy makers in identifying, analysing and building on the linkages between agro-biodiversity, gender and local knowledge systems.
- 2002** **Training of network members of the Sub-Saharan African Soil Fertility Network in livelihoods analysis in Zimbabwe (DFID / CIMMYT).** One-week training programme for soil scientists and agricultural economists, including field training sessions.
- 1998** **Training of trainers in participatory livelihood analysis / PRA, needs assessment, monitoring and evaluation for MAWRD / Namibia (DFID funded).** Support to the Namibian Ministry of Agriculture, Water and Rural Development in their transition to a more demand-lead agricultural research and development strategy.
- 1997** **Training of staff from Asian GTZ projects in participatory livelihoods analysis / PRA (Participatory Rural Appraisal) (GTZ).** Field-based training course in India, working in partnership with a local CSO that used the outcome of the training workshop for the planning of local development initiatives.

### **Social policy, poverty, and drivers of change**

- 2007-09** **Civil Society Challenge Fund (DFID).** Performance assessment of ongoing projects. The fund supported Civil Society Organisations to help poor and excluded people to enhance their capacity to organise and get their voice heard, and to demand better services and better access to them. Monitoring visit with DFID programme officer to three CSCF-supported projects in Albania (rights-based approaches to rural development, disability and gender).
- 2007** **Commercial Agriculture Development Project, Afghanistan (Asian Development Bank / Landell Mills).** Development of a gender action plan and poverty strategy for this project, using ADB formats and guidelines. This included the development of performance indicators and the design of an M&E component to monitor gender and poverty impact.
- 2002-04** **Pathways from poverty for paddy farmers in Bangladesh (DFID / PETRRA).** Interdisciplinary research project identifying drivers of change explaining the social and economic mobility of paddy growing smallholders in three areas of Bangladesh. In charge of case studies and development of policy recommendations.
- 2001-02** **Social and human capital aspects of soil fertility management in semi-arid India (DFID / HTSPE).** Multi-agency, multi-disciplinary research project to identify the social and human capital aspects of soil fertility management practices, in order to develop policy recommendations

to the state governments of Andhra Pradesh and Karnataka, and to inform future research and development interventions. Lead scientist.

**2001-02 Role of social networks and paddy marketing in Bangladesh (DFID / NRIL).** Research project exploring the role of social networks in helping small scale farmers to obtain credit and assist them in marketing. Analysis of factors resulting in social change and its impact on equity and vulnerability. In charge of case studies and development of policy recommendations.
